Quantitative-qualitative balance: 30% quantitative 70% qualitative

Editorial philosophy: Since its first issue in January 1981, the Brazilian Journal of Political Economy is a peer reviewed journal, which sees economics as political economy. Papers with Keynesian, structuralist, or institutionalist approaches are welcome. The Journal publishes papers on development economics and macroeconomics, adopting a historical-deductive method, as well as papers criticizing economic theory. The Journal also welcomes applied papers containing relevant research, having as a priority papers on developing countries. It is expected that literature reviews should not ignore relevant Brazilian and Latin American authors. In the case of econometric studies, technical aspects will be published only in the journal's electronic edition. Papers are published according to the date that they are approved, but some priority may be given to those in English. In accepting submissions the Journal adopts, as an additional criterion, the scope of the paper and its interest in publishing it.

Use of photographs or graphics: No to photographs; graphics, yes

Are proposals for special guest-edited thematic issues considered? No.

Other special features about the journal: This is an open access journal. In the area of economics, it is the most cited journal, by far.
